

The Yolo Democrat.

COUNTY AND TOWN OFFICIAL PAPER.

WOODLAND, CAL.
Friday, April 18th, 1873.

SNOW BOUND.—The westward bound trains on the Union Pacific Railroad are snow-bound in the Rocky Mountains.

IMPROVING.—Latest news from the Lava Beds reports Commissioner Meacham improving. His wife had arrived from Oregon and went forward to join him.

SHOT.—A man named Flinn, believed to be a brother of Mortimer, was shot in the Sacramento jail yard on Wednesday, for attempting the release of the latter.

REV. DR. THOMAS.—The Indian Commissioner killed by the Modocs, was father of Mrs. Urmy, wife of Rev. J. S. Urmy, Methodist Minister, stationed at this place last year.

SOLD OUT.—We learn from the Valjeo Independent, that Fred. Werner has sold his fine ranch at Davisville, including the stock, etc., to his partner, Henry Hamel, for the sum of \$24,000. Fred. proposes to make a visit to the East and Europe in a short time.

THE SECRET.—An enterprising firm in the town of Portsmouth, commenced business in that place after the war, with a capital of forty dollars, and their bank account of January last, footed up forty-eight thousand dollars. When asked their success, the reply was: "Printer's Ink."

THE BENICIA TRIBUNE.—The first number of R. D. Hopkins' paper, with the above name, was published on Saturday last, a copy of which has been received. It looks well, and is very well gotten up as to quality and quantity of matter—size 21x33. Better luck to you than you met with in Woodland, friend Hopkins.

MORE COOLIES AND DISEASE.—The steamship Colorado arrived at San Francisco from China on Sunday last, bringing twelve hundred and sixty more coolies, several of whom were infected with the smallpox. The vessel was quarantined, but the cabin passengers were allowed to land, and it is feared the disease will spread.

BATTLE WITH THE MODOCOS.—A dispatch from Gen. Gillem, dated at the Lava Beds, April 15th, to Gen. Scott, San Francisco, says they had been fighting the Indians all day and driven them to their strongholds with the hope of surrounding them. The losses of that day were three men killed and Lieut. Egan and nine men wounded. The probability is that the whole band of Modocs will be exterminated.

SEVENTY-NINE APACHES KILLED.—The Arizona Miner of April 12th says that George Swain, John McDonald and George Taylor were murdered by Apache Indians, and that within twenty days after, seventy-nine warriors were killed by U. S. troops and twenty-six women and children made prisoners. The Miner says that never since the settlement of Arizona has retribution so speedy and full overtaken the Apaches as in this instance.

THE INDIAN MASSACRE.—We publish on our first page a full account from the Chronicle of the cold-blooded massacre of General Canby and Rev. Dr. Thomas, and the dangerous and not mortal wounding of Commissioner Meacham, by the Modoc Indians, on Saturday last. This perfidious act proves that the Quaker policy of the Administration will not do. It is too bad that such men should be cut down by such worthless specimens of humanity. Now, however, the Indians will, no doubt, be pretty roughly handled.

NEWSPAPER POSTAGE.—The *Alameda Enquirer* is in doubt as to the item in our issue of April 5th stating that newspaper postage and the system of free exchange remained the same as before the passage of the new law of Congress abolishing the franking privilege etc. Our information was obtained from *Roulet's Newspaper Reporter*, which is published in the interest of newspaper publishers, and we believe was stated correctly, though of course we may have been mistaken, and if so would like to be corrected. The paper referred to having been mislaid we cannot refer to it again for proof. Our Postmaster has not as yet received any instructions from the department on the subject.

SAUCILITO NARROW GAUGE RAILROAD COMMENCED.—Work was commenced on the North Pacific Railroad at Saucilito, opposite San Francisco, on Monday last, and as the occasion was one of considerable importance to that place, as well as to San Francisco and the country through which the road will pass, a large number of guests were invited, and quite a demonstration was made in honor of the event. The first sod was turned with the usual ceremonies, after which Gen. Gobbs, President of the Saucilito Land and Ferry Company, made a speech showing the natural advantages of Saucilito and its future importance. C. D. Moore, President of the Railroad Company, said the road would be of three feet gauge and would run to the Walhalla river, 115 miles. The road is estimated to cost \$10,000 per mile. Bonds have been issued by the company and negotiated in Frankfurt Germany to the extent of \$1,500,000. A thousand tons of iron have arrived and more on the way. It is intended ultimately to extend the road to Humboldt Bay.

Change of Publication Day.

This paper will hereafter be published on Friday morning, instead of, as heretofore, on Saturday morning. It is proper that our readers should know the reasons for this change, the first and most important of which is, a conscientious conviction that laboring on the Sabbath day of the week is a violation of God's Holy Law, as expressed in the Fourth Commandment of the Decalogue:

"IV. Remember the Sabbath Day to keep it holy. Six days shalt thou labor and do all thy work, but the seventh day is the Sabbath of the Lord thy God. In it thou shalt not do any work, thou, nor thy son, nor thy daughter, thy man servant, nor thy maid servant, nor thy cattle, nor thy stranger that is within thy gates; for in six days the Lord made heaven and earth, the sea and all that in them is, and rested the seventh day; wherefore the Lord blessed the Sabbath Day, and hallowed it."

This step is not taken without due consideration of its importance. Thousands are with us in this position, and we believe thousands of others will be. John Quincy Adams, tenth President of the United States, and one of our country's best and most eminent Chief Magistrates, said:

"The Decalogue, having been spoken by the voice, and twice written upon the stone tablets by the finger of God, may be considered as the foundation of the whole system of religion and morality."

Doubtless the change in our publication day will be beneficial as regards the distribution of the DEMOCRAT among its many patrons. Though the forms have heretofore invariably gone to press on Friday, and we have nearly always placed all the packages to go out to different parts of the county on Saturday morning—either by stage or railroad—in the Postoffice or Express the night before, yet there has been much complaint that they did not reach their destination till some time the week following. We trust this difficulty will not exist hereafter. The general character of the paper will not necessarily be interfered with.

Communications or advertisements must be in the office on Thursday morning, at latest, to insure insertion.

THE GEN'L R. E. LEE MONUMENT.—The grand monument to the memory of General Lee is now rapidly being constructed under the direction and skill of Prof. Volentine. And in order to complete it at the earliest possible date, the Executive Committee of the Lee Memorial Association, of Lexington, Va., which is composed of distinguished men as Gen'l Pendleton, Gen'l Terry, Hon. Wm. McLaughlin, Col. Preston Johnson, Chas. Davidson, and others, have authorized the publication and sale of a perfect life size steel engraved portrait of General Lee. The proceeds of its sale to be applied in furtherance of the object of this Association, namely: to the erection of a monument to the memory of Gen'l R. E. Lee, at the Washington and Lee University, Lexington, Va. The portrait will be sold only by subscription, through the regular authorized agents. Every subscriber for the portrait will receive a certificate signed by the Secretary and Chairman of the Memorial Association. We commend this portrait to the public, and hope some good energetic man will secure the agency in this section in order to help on the good work. Messrs. W. W. Bostwick & Co., Nos. 177 & 179 West Fourth Street, Cincinnati, Ohio, have been constituted and appointed General Managers of Agencies, and any communications addressed to them for circulars, terms, and certificates, will receive prompt attention.

AN IMPORTANT ENTERPRISE INADVERTENTLY.—The Farmers' Union, at its convention in San Francisco last week, adopted the following resolution: "Inasmuch as the farmers of this State find themselves a prey to moneyed rings in the matter of grain sales, we refer this matter to the Executive Committee of this body, with instructions to consider the propriety of utilizing the State Prison, in the production of a sufficient number of sacks each year for our home consumption, to be sold to the farmers at their actual cost, thus saving the profit now made from us by the dealers." President Bidwell, in his address, pointed out that the amount of money unjustly taken out of farmers' pockets, annually, on their bag purchases, is \$500,000. This represents the tariff of 4 cents per bag on 12 1/2 million bags. In addition to this whatever sum dealers and manufacturers are enabled to bring by means of combinations or from the legitimate demand insufficiently supplied. From this imposition the farmers ask to be relieved.—Record.

VERY PROPER ACTION.—In their great Convention at Springfield, the farmers of Illinois, met without distinction of party, adopted this resolution with but one dissenting voice: "Resolved, That, without regard to politics or party ties, we do most emphatically place the seal of our condemnation upon our Senators and Representatives in Congress from this State, who, by their votes, increased and a bonus of \$7,500 per annum, and a bonus of \$3,000 for services already rendered; and we further condemn the President of the United States for signing the bill by which they were enabled to realize the increased pay, and his own salary increased \$25,000 per annum."

DEAD.—The New York Herald believes the great Credit Mobilier party is in artful retreat, and says: "With the expiration of the debates and degraded Congress passes away the Republican party. No continued professions of virtue and reform can save the political organization whose leading members, with a large majority in both Houses of Congress, have shielded corruptionists and perjurers and thus made themselves responsible as a party for the offences they were too cowardly or too base to condemn."

FARMERS' CLUB MEETING.—Tomorrow (Saturday), at 2 P. M., at the Court House.

Letter from Hollister.

[From our Special Correspondent.]

HOLLISTER, MONTREY CO., April 15th, 1873. EDITOR DEMOCRAT:—I do not propose to impose upon your valuable space and the readers' time with another long array of the genealogy of Monterey county towns, but to come back from our scurry around the country and take another look at the pleasant and smiling faces of our home village, and form one of the many group of gossipers.

The month of March is often compared to a lion, but the shaggy mane and like tail are undisturbed, and a lamb would make the analogy more complete for this year, for scarcely a cloud has darkened our horizon or a strong wind visited us during the entire month; even the equinoctial storm has given us the slip, and April showers are our only winter dower.

The grain prospect is good for early sowing, but this year must be a lesson to farmers not to waste seed by sowing after the time for the grain to have come up; nature can not make up in rapid growth what many farmers lose in sowing late. We must pattern after our neighbors of the Stockton country, and sow before January, or not expect a good crop.

The season for town improvements is at hand, and quite a number of persons are awaiting the arrival of suitable material for building dwellings. There has been an inclination heretofore to construct business places, with little interest manifested in the way of comfortable dwellings. The present prospect is that the people now consider themselves settled, and begin to prepare to live, as well as to make money.

In the way of amusements, our village exquisites can do no better than a base ball club or a skating rink—the latter being the leading excitement—where the gay and giddy slip round and round, or fall down and down, as the case may be, for the amusement of an assembled score or more. Your correspondent's inquisitive nature led him to invest a smooth quarter of a dollar in the aforesaid delectable whirl of gaiety. After standing a short time the looker-on becomes conscious of a great desire to buy skates, and but a little frenzied meditation is sufficient to make any one believe himself a skater of at least the third magnitude, and 'ere he is aware, he has donned a pair of these immaculate "Plymtons." The experience I had upon rollers has caused ten days' delay in this letter. I suppose my grief has been a public relief.

The division of Monterey County has been a vexed question for two years, and the "ifs" and "ands" have been discussed by two legislatures, and the talk now is that another body of law-makers is to be "buzzed" over the same subject. We may expect warm work, for the "wills" and the "wonts" are about equally divided, and each resolved to fight to the last ditch; the probabilities are, however, that the opponents of the measure will consider it cheaper to let this part be separated than to make a continuous moneyed fight; for it is a foregone conclusion that division will come, sooner or later. This county is practically out of debt, there being no indebtedness except some of the county scrip—probably not more than fifteen thousand dollars in the aggregate. The rate of taxation last year was \$1.17, there being but four counties in the State with a lower rate, which we consider is doing very well for a southern county covered with Spanish grants.

The farmers of this section seem alive to their own interests, and are joining their efforts with their co-laborers all over the State for an improvement in the old ways of doing things; and any one who has worn farmer's boots for one year should be able to appreciate their cause and lend a helping hand. The Club of this place numbers some eighty members—live, active, thrifty farmers, who are determined that the price of sacks and freight shall not hereafter eat up all the profits of their labor. Mr. J. D. Fowler left this place last Monday for the purpose of attending the State Farmers' Convention, and represents this section well, both in spirit and size; the only danger we apprehend from our representative is that he may be deceived and present his credentials to the Woman's Suffrage Convention in session.

"The mills of the gods grind slow, but exceeding fine" might be paraphrased and applied to the political wheel. Our hon. representative (?) has been rewarded—I suppose for favors shown—with the Postoffice at Hollister, and the very remarkable point about it, that it should be taken from one Republican and given to another, and Mr. Hayes, the late P. M., know nothing about it. The general opinion is that Sargent has a good memory, and remembers the "truly loyal."

It is the time for another town election, and of course warm times are expected between the "Ins" and the "outs." We hope both may win, and the printer get his pay for tickets. More anon.

JAMES I. M. MCCONNELL.

FLOUR WITHOUT MILLSTONES.—A machine for making flour without the use of millstones, has just been started in England. The grain is crushed by one thousand little trip hammers attached to the proper machinery to produce the results desired. The new machinery is very cheap and does up its work in a scientific manner. The flour produced is said to be far superior to that obtained by grinding. A pound of mill costing \$1,000 will produce as much flour every day as an old fashioned mill costing \$5,000. The new mill is very simple. When a hammer is out of order you can replace the same for a few cents. For four thousand years millers have produced flour by grinding the grain with stones. What results it will produce in this country remain to be seen.

Cacherville Letter.

[From our Regular Correspondent.]

CACHEVILLE, APRIL 16th, 1873. EDITOR DEMOCRAT:—The long season of dryness has brought to this vicinity a shade of discouragement. During the visit of old Bones, who made his appearance last Sunday, there could be found, assembled on the corners, agriculturists, deeply interested in ascertaining the productive qualities of some distant country, the object of which may be well imagined. However, the people feel somewhat encouraged, as they realize that they will soon be made happy by having a railroad running through their fields, either by one company or the other.

The line of the Central Pacific has been surveyed, running about three hundred yards below town. Ben. Crocker was in town last Sunday and had an interview with some of our influential men. His object was, by their influence, to gain the right of way for the railroad through this locality without much if any expense. The company were successful in this on the other side of the creek, and no doubt they will be on this side, as the land owners in this vicinity are, in general, in favor of a road by any company. Notwithstanding the talk and preparations, many think it a scare and can only believe a road will be built when they see the "locomotion" coming.

Messrs. Pace & Cramer have opened a meat market to supply the people of Cacherville. A. Petit has manufactured a patent harrow. It is so constructed that a roller with teeth projecting in every direction revolves and pulverizes the clods. It is, surely, a valuable patent if it proves successful, which its constructor feels confident it will.

A SHIP THAT HAS COME HOME.—The ship that was to bear fortune to the "Chase heirs" has at last come home, bringing with it the snug sum of \$200,000,000, to be divided among the American heirs of three brothers, the Englishmen, who emigrated to this country about the year 1689. Of these brothers Aquilla settled in Newburyport, Massachusetts; Thomas in Rhode Island, and William in Yarmouth, Massachusetts. A fourth brother named Richard remained in England. The vast property comes by descent from a Mr. Townley, living about the year 1680 at Towney Hall, in Lancashire, England. He was the progenitor of a certain Miss Mary Townley, who married a man named Chase, who was the father of the four sons mentioned. This Mary Townley was the heir of all her ancestor's immense riches. A late decision in the English courts has given three-fourths of the sum of \$355,000,000, the full amount of the inheritance in our times, to the American heirs; the remainder, about \$125,000,000, having already been distributed among the heirs of Richard, who had remained in England.—New York World.

REVUE DE LA MODE.—The April No. of this ladies' magazine is received containing the latest styles for ladies and children's dresses, with large diagrams of patterns, etc. Published by S. T. Taylor, Importer, 816 Broadway, New York City, at \$3.50 per year.

DEATH.—Lieut. Sherwood, of the Twenty-first Infantry, died April 15th from his wounds, received on the 11th inst., while receiving a flag of truce from the Modocs.

HOUSEHOLD.

A PROTEST AGAINST PATCH
pestilent fellows lately prostitute cultural fairs to the promotion of promising premiums to the best. And there was not wanting folk to come forward and compete for them. Now, I do not mean to say that it is not sometimes be requisite and well for the body as the soul; but a great deal of darning and patching beyond what is wholesome have seen women darning stockings as stockings, had no further existence.

economy would have put the ragbag and sewed up the legs into and to see a human being, capable and hope and memory and judgment away from this great, beautiful world the stir and thrill of multifarious life itself to driving a stupid little steam back and forth through a yawning dilapidated toe when whole steam be bought at forty cents a pair of choly, not to say exasperating.

and there is a nervous irritability really allayed by a short and sharp jab at the needle, and there are accidents which demand a stitch or two. No right-minded woman will refuse a protracted and repeated darning.

on principle and from choice, a proud and vainglorious prostitution, the shrine of this little one-eyed despot for gods and men to weep over, prizes to! I say again, if a woman she must, and that is the end of it often thinks she must when she must. She often darts and mends and mends what it would be cheaper to throw away.

infinitely cheaper, as regards time and happiness, which are—and not dearer in respect of money—only represents value. Patient C, do not let your patience—which in

ure and for right purposes is a d
—degenerate into meanness of
idity of mind, poverty of resourc
quiescence in what is not inevita
short and its issues mighty, and
things which ought to be done
taking, and things that ought t

slightly, and things that ought
done at all. She is the wise wou

WASH FOR THE SICK ROOM.—This recipe makes a deliciously refreshing in the sick room, and cools the head:
Take of rosemary, wormwood

Place in a stone jar, and turn
gallon of strong cider vinegar, co
and keep near the fire for four
strain, and add one ounce of pow

There is a French legend connected with this preparation. During the reign of Louis XIV. at Marseilles, a band of robbers plundered the highway between the city and the sea, killing and the dead without injury to themselves. They were imprisoned

condemned to die, but were permitted to live on the condition of disclosing the secret. They could ransack houses infected with the terrible scourge. They gave the secret.

Another mode of using it is to wash the face and hands with it before exposing the self to any infection. It is also very refreshing in the sick room; so, to accomplish nothing more, it is of great service.

AMMONIA FOR STAINS.—I am acquainted with wine stains, but the case where an acid has taken the color from a fabric, ammonia will restore the color. I would suggest to A. H. W. that

would suggest to A. E. W. that carpet in ammonia water, say a full of concentrated ammonia to warm suds, will take almost any stain. I don't know but I could do it without my bottle of ammonia.

shouldn't like to try. In clear glass, silver or gold, it is invaluable as for keeping the hands soft and cleaning all these other things. For cleaning windows, I put a teaspoonful

Stains, pencil marks, fly specks, in any manner of dirt, disappear under this treatment with no injury to the fabric.

USEFUL RULES.—The following given for liquid measurements :
Sixteen large tablespoonfuls =
pint

Eight large tablespoonfuls are
Four large tablespoonfuls are
Two gills are half a pint.
Two pints are one quart.
Four quarts are one gallon.

A common-sized tumbler holds
